

## **TARGET -VALIDATION COULD BE MORE THAN A FAIRYTALE !**

Rely on the experience and services of **HealthTwist** and gain that crucial increase in security for your pipeline decision.

**HealthTwist** transforms your animal study-based hypothesis into human genetics-based evidence.

**HealthTwist** spares you risks of bad investments, saves your money and your time by evaluating and ranking targets. Don't miss out that essential competitive advantage.

**YOU INVEST MILLIONS IN A TARGET  
FOR YOUR BLOCKBUSTER DRUG?  
INCREASE YOUR CHANCES NOW!**

**In a nutshell:**

**HealthTwist...**

...provides fundamentals for a causal therapy of complex diseases by delivering functional evaluation of previously identified genes in man.

...has access to a pool of almost a thousand twin pairs for its studies. This genetically highly informative sample ensures your competitive edge:

## Service Description

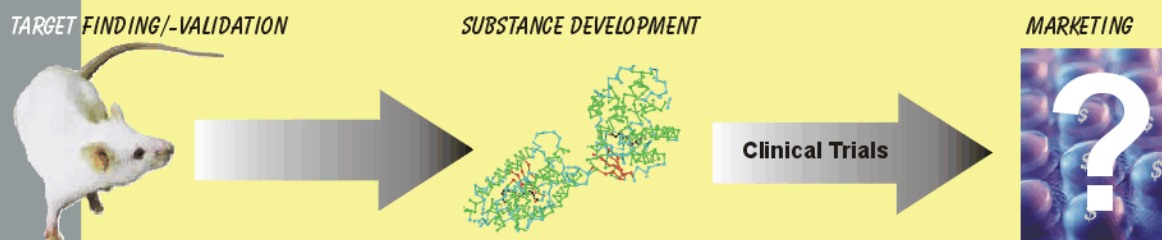

## Company

**HealthTwiSt** is a start-up life science company based at the prestigious biomedical research and industry campus of the Max Delbrück Center for Molecular Medicine in Berlin-Buch.

## Service

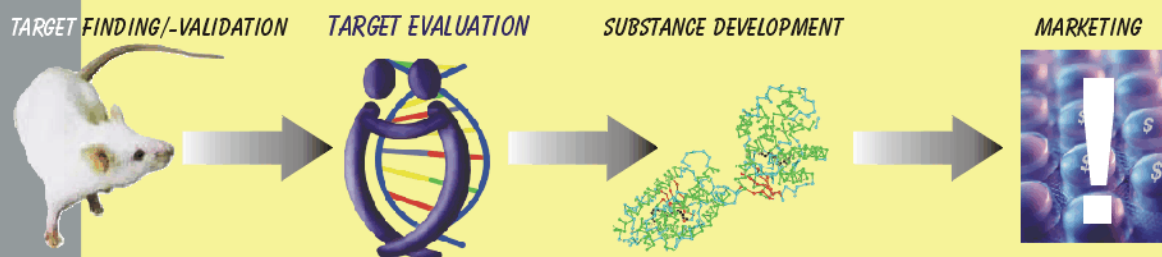

We provide you with clinical data, biological samples and DNA from our studies in healthy twins and patient-centered core families.

Our quantitative target evaluation enables you to take informed decisions for your future developments.

**HealthTwiSt** is bridging the gap between target finding/validation in animal studies and clinical development in man.

Our approach of functional genetics of quantitative traits translates into a devalidation of targets with low potential and high risk of side effects as well as a target-ranking for your pipeline.

Pharmacogenetic studies and metabonomic studies are possible.

**Whether you are engaged in target finding or target validation or whether you purchase targets for own your clinical development, don't miss out on our target evaluation !**

## Customers

**HealthTwiSt** is serving:  
biopharmaceutical companies, proteomics companies, producers of functional food, diagnostics companies as well as academic research institutions.
